SERIES 60C
Multi-Function Joystick

FEATURES
• Three-in-One Joystick, Optical Encoder and Pushbutton
• Compact Packaging
• Choices of Cable Length and Termination
• Customized Solutions Available

APPLICATIONS
• Avionics
• Medical Equipment
• Automotive Navigation, Information & Entertainment Equipment

The 60C is a cost-effective replacement of a stationary mouse or trackball with improved control over cursor movement. An integral Schmitt Trigger is used to stabilize against noise and vibration.

As a compact cursor control device, Grayhill's Series 60C is ideally suited for automotive and aviation dashboards, where use of separate joysticks, encoders and pushbuttons might be impractical. It provides all the functionality of a stationary mouse or trackball in a single unit with a 1"x1"x .661" deep housing. The joystick manipulates a cursor left, right, up and down; the rotary encoder facilitates sequential scrolling through menu options; and the pushbutton performs on-screen menu selects.
