1/ For retention of qualification or extension of qualification to lower failure rate levels, all life test data accumulated on MIL-PRF-83536/34 data may be used in addition to the MIL-PRF83536/35 data. Prior to performance of retention of qualification testing, the relay manufacturer shall preselect the sampling plan.
2/ The number of units required for qualification testing shall be increased as required in group V, table II of MIL-PRF-83536, if the contractor elects to test the number of units permitting one or more failures. Prior to performance of qualification testing, the relay manufacturer shall preselect the sampling plan.

Qualification inspection (reduced testing) (sample size - 2 units each coil voltage and 1 unsealed unit). See table V.
If the relays produced for MIL-PRF-83536/34 are similar in construction and design except for the suppression network to the relays produced for MIL-PRF-83536/35 then reduced testing for qualification of MIL-PRF-83536/34 relays may be performed concurrent with or subsequent to successful qualification of MIL-PRF-83536/35. For reduced testing see table V .
